Problem statement: Friend Finder (Friender)

4 W's: Who is experiencing the problem? What is the Problem? Where does the problem present itself? Why does it matter?

Who: People of all ages who have niche interests or have a hard time finding like-minded friends

What: A lot of people find it difficult, especially outside of school and extracurricular activities, to find friends who genuinely enjoy the things that they do.

Where: New students on campus who are having a hard time meeting new people and making friends. Could also be used for people who have moved into a new state/city and would like to make friends.

Why: This matters because there are individuals who are looking for a community with similar interests as them.

Match-Making

Interest based

Proximity based

Age based

School/Campus based

Security

Educational tips ("Don't meet someone you don't trust, bring a friend, etc.)

Include a 911 emergency call button within the app.

Enable some kind of emergency response feature (For Example: an alarm will go off in 30 minutes, if not silenced call the police)

Add a captcha test so people do not create bot accounts

Verify your account, proof of identity (drivers licenses, student ID)

The option to block or report someone

Your friend or people you trust can see your location when on "dates"
